

Shea Butter: Shea butter is extracted from the nuts of the Shea-Karite tree and contains a high content of fatty acids that give it unique healing properties. It provides anti oxidant, anti-inflammatory and moisturizing effects on the skin. Highly concentrated with Vitamins A, E, and F, which protect skin from sun damage and premature lines.

DMAE: DMAE triggers a response in the facial muscles, which creates a firmer facial tone and less sagging. It has a cumulative effect to help reduce the progression of facial sagging.

Amaranth: Amaranth contains a high percent of non-saturated fatty acids, 8% plant source of squalene and vitamin E in tocotriene form. It has antibacterial, antiviral, burn and wound healing properties, and improves the biological qualities of the skin. The Squalene in Amaranth retards the effects of skin aging and development of lines and wrinkles, as it is easily absorbed by the skin and gives antioxidant protection.

Bergamot, Lavender, Neroli and Rosemary Essential Oils: Essential Oils are extracted from various parts of plants through a number of methods. Extraction concentrates the potent liquids until the end product (the essence of the plant) is poured into a small bottle. These oils have antibacterial, antiviral, antifungal, healing, hydrating, relaxing, invigorating and curative properties. Bergamot: Its fresh airy fragrance lifts the spirits immediately, used for anxiety, depression, mood swings, and insomnia. It is an effective antiseptic, and also an anti-viral and cell-rejuvenating oil and is particularly effective at clearing acne, eczema, dermatitis and psoriasis, cold sores. The scent is fresh, citrus and refreshing. Lavender: A renowned skin cell regenerator prevents scarring, stretch marks and wrinkles. Extremely beneficial in treating burns, sun damage, wounds, rashes and skin infections. Its aromatic qualities are specific for nervousness, exhaustion, insomnia, irritability, depression. Neroli: Helps to clear broken blood vessels

by aiding with circulation, reduces fine lines associated with aging, eases stretch marks, regenerates new skin cells, and tones mature, dry and sensitive skin. Its aromatic qualities help to relieve fatigue, depression, nervousness, anxiety, fear, and confusion.

Retinyl Palmitate: A Vitamin derivative and essential nutrient for maintaining healthy skin. It moisturizes dry skin and reduces excess oil, acts as a natural exfoliant to eliminate dead skin cells and helps to increase the collagen and elastin in the skin,

Rthree™

repair • restore • renew

LOTION

Finally a specially and naturally formulated exclusive skin care lotion for all skin types! R|three is a highly concentrated natural lotion containing powerful ingredients at high percentages to provide a cumulative effect for rejuvenating new skin and collagen cells, repairing damaged cells and tissue, providing unprecedented cell development, antioxidant protection and lasting superior hydration!

R|three is a unique proprietary blend and high percent (26.5%) of age defying, firming peptides that activate new cell growth, aid in tightening and firming the skin, prevent development of fine lines, improve skin thickness and elasticity. R|three aids in the healing of scar tissue, burns, stretch marks, lasered and peeled skin, psoriasis, eczema, sun damaged and aged skin. R|three provides potent and effective antioxidants that destroy free radicals and inhibit oxidation of cells, and prevent skin damage, thereby slowing future aging of the skin. R|three provides a soothing, calming and healing effect to the skin.

 **FEDERMAL™**

INSTRUCTIONS FOR USE

Shake well and pump twice. (Before applying, you may dilute the concentrated **R|three** Lotion with a few drops of water or sun-block.) Spread the **R|three** Lotion on cleansed, moistened skin morning and night, by gently smoothing on the entire face and neck, including around the eyes. The intense formula will cause slight tightening as it's absorbed into the skin.

Every key ingredient has been selected because it has a specific purpose

KEY INGREDIENTS INCLUDE:

Acetyl Octapeptide: Better known as the “next generation” in technology, this is the most potent and effective peptide available. It has a unique mechanism that relaxes muscle contractions rather than paralyzing them as Botox does, this leads to a reduction and prevention of fine lines.

Palmitoyl Tripeptide-5: A combination of amino acids to help encourage aging skin to produce collagen and retain moisture. This combination of peptides will help to prevent future lines and provide a reduction in present lines.

Hydronium: A highly concentrated anti oxidant that protects skin from free radicals and accelerated aging. Free radicals attach to skin's cells, which cause unprecedented damage including inflammation, dead tissue and aging.

Silk Proteins: Silk derived from the silkworm is a natural protein that contains 18 amino acids and vitamin E. It can be absorbed directly into the skin and provide essential nutrients to repair damage. It even contains UV ray inhibiting properties to control exposure and melanin production. Absorbed instantly, it softens lines and gives your skin a smooth and youthful complexion.

Hyaluronic Acid and Liposomes: Hyaluronic acid is known as the key to the fountain of youth for its hydrating and moisture retaining results. It occurs naturally in our skin and body and as we age, Hyaluronic acid is depleted. Hyaluronic acid is able to absorb 1,000 times its weight in water and adds suppleness and moisture to the skin, and encourages new cell growth.

Liposomes are the unique molecular delivery system for the Hyaluronic acid, making it highly bio available and absorbable to the deeper layers of the skin.

Idebenone: Idebenone is a newly discovered, extra powerful anti oxidant that can effectively fight the signs of aging brought about from free radicals, sun damage, inflammation, air pollution, ozone, cigarette smoke and aging. It is one of the most effective ingredients to prevent cell damage, which in turn prevents advanced signs of aging.

Vegetable Glycerin: A valuable natural source ingredient with moisturizing and emollient properties, which can soften and soothe the skin and assist the epidermis in retaining moisture during the day and night.

Organic Aloe Vera Gel: Grown and processed organically, this gel is the leaf pulp from the inner portion of the aloe leaf. Aloe Vera has intense soothing and anti-inflammatory effects that will speed the healing of burns, damaged eczematous skin, psoriasis, frostbite, ulcers and other dermatoses. It also possesses the ability to interfere with the enzyme that produces melanin deposits in the skin, helping to prevent the formation of age spots.

Jojoba: Jojoba is a unique high quality oil or lipid. Native Americans extracted the oil from jojoba seeds to treat sores and wounds centuries ago. Jojoba serves as an excellent moisturizing agent, leaving a rich velvety non-oily feel on the skin, and increasing the suppleness of the skin. It aids in keeping our skin's natural barrier in tact, by retarding water loss through the epidermis.

Avocado Oil: Avocado is a fruit that yields a rich and extremely deep penetrating oil, rich in vitamins A, D, and E, lecithin and potassium. It provides healing, anti-bacterial and anti-wrinkle benefits to the skin. Studies have shown that avocado oil significantly increases the amount of collagen in the skin, since it penetrates the skin more deeply than other plant oils. Its strong UV absorption properties make it an ideal supplement to block sun damage.
